Access Anywhere

• EVERYTHING YOU NEED

Powerful Modules. One Unified Platform.

A complete suite of tools to streamline every aspect of your institution — from hire to retire, admission to graduation.

Employee Management

Manage profiles, departments, designations, categories, joining dates and credentials in one place.

Academic Structure

Define programmes, courses, semesters, divisions and batches. Flexible hierarchy for any institution.

Attendance & Timesheets

GPS-based punch-in/out with selfie verification and biometric device integration in real-time.

Work Shifts

Create flexible shift schedules with start/end times, grace periods, and late-mark rules per shift.

Leave Management

Configure leave types, quotas and approval chains. Employees apply, managers approve — all digital.

Approval Workflows

Centralised hub for overtime, comp-off and attendance corrections with step-by-step status tracking.

Reports & Analytics

Attendance reports, leave summaries and custom exports. Filter by date, department or employee.

Announcements

Broadcast institution-wide or targeted notices visible to staff on their self-service portal.

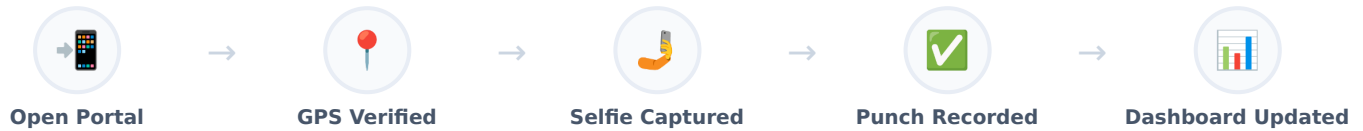

Multi-Organisation

Super-admin manages multiple schools from a single dashboard. Ideal for education groups & trusts.

• STAFF MANAGEMENT

Smart HR Built for Schools

Handle every step of the employee lifecycle — from onboarding to daily attendance to leave approvals.

Attendance System

GPS-verified, selfie-authenticated punch-in/out tied directly to biometric devices or the employee's mobile browser.

- ✓ Real-time GPS location on every punch
- ✓ Mandatory selfie for punch verification
- ✓ Biometric device integration (fingerprint/face)
- ✓ Configurable shifts with grace periods
- ✓ Late, absent & present auto-calculation
- ✓ Manual correction with approval workflow
- ✓ Comp-off management for extra work days
- ✓ Monthly timesheet view per employee

Live Dashboard

Pending
Approvals queue

Leave Management

- Multiple leave types (CL, SL, EL, etc.)
- Per-employee leave quota tracking
- Multi-day range leave requests
- Approval / rejection with reasons
- Leave balance auto-deduction
- Full leave history per employee

Shift Configuration

- Multiple shift types per institution
- Grace period & late-mark rules
- Assign shifts per employee group

• BEYOND HR

Academics, Devices & Self-Service

A complete ecosystem — manage the full academic hierarchy, hardware devices, and empower every user with a personal portal.

Academic Structure Management

Define and manage your institution's complete academic hierarchy — programmes, courses, semesters, divisions, and batches — with full student enrolment tracking and intelligent batch filtering.

Batches

Student Enrolment

Batch Filtering

Employee Self-Service

Every employee gets a personal dashboard — view schedule, punch attendance, apply for leave, and read announcements.

GPS + Selfie Punch

Employees punch in/out from their phone with live location and selfie capture — no physical device needed on the go.

Device Management

Register and monitor biometric attendance devices across multiple sites. Active device count visible on the admin dashboard.

Student Management

Maintain student profiles with admission numbers, batch assignments, and contact info — fully searchable and filterable.

Institution Notices

Publish announcements visible to all staff instantly through the self-service portal. Keep everyone aligned in real time.

Role-Based Access

Super Admin, Admin, Teacher and Employee roles — each with precisely scoped permissions and dedicated views.

ENTERPRISE-GRADE TECH

Built to Scale. Secure by Design.

Modern, cloud-native architecture with containerised deployment, secure multi-tenant data isolation, and a robust REST API layer.

Modern Full-Stack Architecture

Every layer is production-hardened — from the React frontend to the Dockerised Node.js API and PostgreSQL database with Prisma ORM.

Integrations

01

Multi-Tenant Isolation

Each school's data is logically isolated — no cross-tenant data leakage, ever.

02

Role-Based Permissions

Every API endpoint is guarded by JWT + role checks. Fine-grained access control.

03

Containerised Deployment

One-command Docker Compose deployment on any cloud provider or on-premise server.

04

Real-Time GPS Tracking

Location and selfie captured at punch time — stored immutably per attendance record.

05

Biometric Integration

Native support for fingerprint and face-recognition devices via device management API.

06

Scalable Architecture

Stateless API + connection pooling — scales horizontally as your institution grows.
